## Table of Contents

### Introduction

- Introduction
  - Steven M. Arnold and Terry T. Wong

### Current State of ICME

- An Annotative Review of Multiscale Modeling and Its Application to Scales Inherent in the Field of ICME
  - Rani W. Sullivan and Steven M. Arnold
- Critical Path Issues in ICME
  - C.J. Kuehmann and G.B. Olson
- The Four Foundational Groups Required for a Successful ICME Approach
  - David L. McDowell
- The Development and Implementation of Integrated Computational Materials Engineering (ICME) for Aerospace Applications
  - G. Spanos

### Database and Infrastructure Needs to Enable ICME

- Standards-Compliant Formats for Materials Test Data
  - T. Austin, C. Bullough, D. Gagliardi, D. Leal, and M. Loveday
- Ontology Engineering: Computational Informatics for an ICME Infrastructure
  - Krishna Rajan
- Managing Multi-Scale Material Data for Access Within ICME Environments
  - Will Marsden, David Cebon, and Elizabeth Cope

### Current Work and Models in ICME

- Atomistic Simulations for Engineering: Potentials and Challenges
  - Chandler A. Becker
- Multiscale Modeling of Aluminum Oxynitride
- Multiscale Modeling to Predict Properties of Thermoplastic Nanocomposites
  - Samit Roy and Abilash Nair
- Some Key Issues in Multiscale Modeling of Thermoset Nanocomposites/Composites
- A Generalized Framework for Quantifying Material Structure-Property Relationships and Uncertainties: Applicability to ICME
  - M.A. Tschopp, K.N. Solanki, and M.F. Horstemeyer
- Multi-Scale Modeling Applied to Non Linear Constitutive Equations
  - Serge Kruch
- A Multiscale, Nonlinear, Modeling Framework Enabling the Design and Analysis of Composite Materials and Structures
  - Brett A. Bednarcyk and Steven M. Arnold

### Conclusion

- Conclusion
  - Steven M. Arnold and Terry T. Wong
