Organized by four leading materials societies:

The American Ceramic Society (ACerS) is celebrating its 111th anniversary and annual meeting at MS&T'09. Be a part of the festivities. Join your colleagues Monday evening for the ACerS Annual Honors & Awards Banquet during which the new Fellows class is inducted and awards are presented. Don’t miss the ceramic materials lectures: Frontiers of Science and Society - Rustum Roy Lecture, Arthur L. Friedberg Memorial Lecture, Edward Orton, Jr. Memorial Lecture, and Robert B. Sosman Award, Lecture and Session. Participate in the ceramic-focused sessions including Emerging Opportunities for Ceramic Science and Engineering, Richard M. Fulrath Award Session, and Alfred R. Cooper Session and Award. Expand your professional expertise at one of ACerS eight Short Courses, taught by experts in the field. Additionally, stop by the member lounge to take a spin on the prize wheel and network with peers. You’ll find us by registration. Visit us online at www.ceramics.org/annualmeeting.

Association for Iron & Steel Technology (AIST) will hold its Steel Properties & Applications Conference as part of MS&T'09. AIST is committed to supporting research and development activities and collaborations as they relate to steel processing, products and application under the broader and more universal umbrella of materials science. By participating in MS&T since its inception in 2003, AIST and the steel industry continue to strengthen opportunities for technological advancement and exposure. MS&T represents the ultimate forum to explore the latest generation of steel grades and microstructure characteristics. Symposia topics will highlight recent developments in steel alloying, processing and product metallurgy including advancements in the manufacturing of steels to meet the latest CAFE standards and the demands for a new generation of materials for energy applications, zinc-coated sheet steels, and improvements in cast, forged and specialty steel products as well as insight into the variety of applications of electron backscattered diffraction in critical areas of steel-related research. A special symposium has been arranged to honor Professor Edmunds on the eve of his retirement. Professor Edmunds taught at the Institute for Materials Research in the School of Process, Environmental and Materials Engineering at the University of Leeds, United Kingdom. Proceedings of steel-related papers will be published and available for sale. Visit AIST online at www.aist.org.

ASM International (ASM), is hosting several events to recognize our leaders and visionaries, and to plan for a bright materials future.

ASM Leadership Awards Luncheon: In appreciation of the hard work and dedication of our volunteers, awards will be presented to members involved in the ASM Materials Education Foundation, the Committee Council and ASM’s organizational units. Purchase tickets on the registration form.

The ASM 96th Annual Meeting: Attend our annual meeting where we will elect officers for the 2009-10 term, transact other society business, and lay the groundwork for the next 100 years.

ASM Awards Dinner: Help us celebrate the awesome accomplishments of this year’s award recipients and the 2009 Class of Fellows. Tickets, which include the President’s Reception following the dinner, can be purchased on the registration form.

ASM Canada Council Suite: Experience Canadian hospitality!

For more information about ASM, visit www.asminternational.org.

The Minerals, Metals & Materials Society (TMS), one of the founding partners of the Materials Science & Technology Conference, continues to support cooperative and collaborative efforts such as this meeting which benefit the materials community at large. We would like to draw your attention to some key events organized by TMS at MS&T'09:

ASM/TMS Distinguished Lecture in Materials and Society: Forging the Solution to the Energy Challenge: The Role of Materials Science and Materials Scientists by Dr. Jeff Wadsworth, CEO and President, Battelle Memorial Institute.

Computational Materials Design: Experience and Perspectives: A lunch time seminar presented with Penn State’s Center for Computational Design and the PA Go Global.

Materials Digital Laboratory Roundtable Luncheon Workshop: ICME, MatForge, & Gibbs: Presented with the Center for Materials Informatics at Kent State University.

Learn more about TMS, Your Professional Partner for Career Advancement, at www.tms.org.
Ceramic and Glass Materials

Glass and Optical Materials Divisional Symposium
Symposium Organizer: Mario Affatigato

Water in Glass I
Monte-Carlo Modeling of the Corrosion of Glasses by Water ................................................................. 1
F. Devreux, A. Ledieu, P. Barboux, C. Cailleteau, F. Angeli, M. Arab, S. Gin, P. Jollivet,
O. Spalla, and J. Jestin

Optical Properties of Glasses and Ceramics
Evaluation of Photosensitivity of As-S-Se Thin Layers for the Fabrication of Diffractive Optical Elements .......... 5

Glass Properties
Comparative Study of Stress Profile Measurements on Thin, Ion-Exchanged Aluminosilicate Glass ....................... 16
Z. Pan, R. Dugnani, and M. Wu

Glass Applications
Reducing Energy Demand and Carbon Footprint with Batch Solutions .......................................................... 28
I.M. London and C.A. Merivale

Mechanical Evaluation of Frit Sealed Mobile Device ...................................................................................... 39

Multifunctional Oxide
Symposium Organizers: Chonglin Chen, Amit Goyal, Quanxi Jia, Xiaoqing Pan,
Isao Tanaka, and Toshihiko Tani

Processing and Characterizations
Synthesis of Sb4O5Cl2 Nanobelts by Hydrolysis of Alkoxide and Thermal Decomposition Properties of the Novel Nano-Flame Retardant ................................................................. 44
L. Feng and J. Liu

General Poster Session

Ceramic and Glass Materials
Microwave Processing of Liquid Phase Sintered Alumina .................................................................................... 50
V. Miceli, B. Cioni, and A. Lazzeri
Measurement of Thermal Conductivity of Basic Refractories with Straight Brick Specimens by Hot Wire Method .......................... 62
  Y. Saito, K. Kanematsu, and T. Matsui

Microwave Processing of Polymeric Coatings for Guitar Woods ................................................................. 72
  C. Hammond, C. Hill, C. Sprinkle, A. Sorenson, and S. Vera

Does Addition of Fly Ash Decrease the Chloride Diffusivities of the Concrete with Limestone Powder? .......... 82
  J. Xiao, C.-F. Gou, and Y.-G. Jin

Electronic & Magnetic Materials

Domain Microstructures and Mechanisms for Advanced Properties in Phase Transforming Materials
Symposium Organizers: Yu Wang, William T. Reynolds, and Raju Ramanujan

Films and Multilayers

Phase Field Model of Domain Structures and Switching Process in Thin Ferroelectric Layers with Deadlayers ...... 91
  A. Artemev

Nanocomposites

Bottom-Up Magnetoelectrics .......................................................................................................................... 102
  M. Wuttig and S.Q. Ren

Shape Memory Alloys

Deviation of Bulk Magnetic Property Changes from Martensitic Transition Temperature in Ni-Mn-Sn Heusler Alloys at Low Fields ................................................................. 108
  P. Shamberger, A. Pakhomov, and F. Ohuchi

Effects of Magnetic Field Annealing on Recrystallization Texture and Magnetostriction in As-Rolled Fe-Ga based Alloy ........................................................................................................ 115
  J.H. Li, X.X. Gao, J. Zhu, X.Q. Bao, M.C. Zhang, and N. Zhao

Electronic and Magnetic Materials: Copper and Copper based Alloys in the Electronics Industry
Symposium Organizers: Larry Wojnicz, Brett Rickett, and Joe Stainbrook

Lead-Free Solders and Whiskering

Low Temperature of Bi-In-Zn Lead-Free Solder Alloy ..................................................................................... 124

Copper and Magnetic Materials

Improved Bend Formability Testing of Cu-Be Strip ......................................................................................... 132
  J.C. Harkness

Preparation of Magnetic Material Precursor by Chemical Coprecipitation-Decomposition Method ............... 144
  X. Guo, Q. Tian, and D. Li
General Poster Session

Electronic and Magnetic Materials

Crystal Growth and Magnetic Reversal Mechanism in Ferromagnetic Nanowire by Chain of Prolate Spheroids Model ................................................................. 153
  P. Wang, L. Gao, X. Song, S. Yang, L. Wang, and R. Murakami

Microstructure Control of Nd-Fe-B Sintered Magnets by Two-Step Sintering ....................................................... 159

Structural Phase Relations and Ferroic Properties of (x)BiFeO3-(1-x)BaTiO3 Multiferroics Ceramics .................. 168

Mechanosynthesis of the BiFeO3 Multiferroic Magnetolectric Compound ............................................................. 176
  G.S. Dias, V.F. Freitas, I.A. Santos, L.F. Cótica, D. Garcia, and J.A. Eiras

A Novel Approach to Turbine Design .................................................................................................................. 186
  S. Devayajanam, A. Ramadass, and N.M. Ravindra

Phase Development and Dielectric Properties of Pb1-1.5xLa4TiO3 (PLT) Ceramics ................................................... 199
  V.A Chaudhari, P.P. Pawar, and G.K. Bichile

Environment & Energy Issues

Energy Materials
Symposium Organizers: Fatih Dogan, Masanobu Awano, and Dileep Singh

Fuel Cells and Hydrogen Storage

Dual Phase Nano-Composite Pt-CGO Membranes for O2 Separation ................................................................. 211
  L. Zhang, K. Shqau, I. Park, and H. Verweij

Dielectric, Photovoltaic and Other Energy Materials I

Bandgap-Reduced P-Type ZnO Films by Co-Doping Cu and Ga for Improving Photoelectrochemical Response ................................................................. 219
  S. Shet, K.-S. Ahn, N.M. Ravindra, Y. Yan, T. Deutsch, J. Turner, and M. Al-Jassim

Thermoelectrics and Other Energy Materials

The Effect of Stoichiometry on the Thermoelectric Properties of Calcium Cobaltites .............................................. 229
  S. Annamalai, R.P. Bhatta, I.L. Pegg, and B. Dutta

Synthesis of Ca1.24Co1.62O3.86 by Self-Propagating High-Temperature Synthesis .................................................. 241
  S. Lin, J. Selig, J.A. Gomes, and D. Tran

The Effect of Fe2O3 Addition on the Thermoelectric Properties of CaRuO3 ........................................................ 253
  R.P. Bhatta, S. Annamalai, I.L. Pegg, and B. Dutta

The Effect of Mg/Co Ratio on the Thermoelectric Properties of Magnesium Cobaltite ........................................ 265
  S. Annamalai, R.P. Bhatta, I.L. Pegg, and B. Dutta

Dielectric, Photovoltaic and Other Energy Materials II

Enhanced Crystallinity and Photoelectrochemical Response of (Ga, N) and (Al, N) Co-Doped ZnO Films ........ 277
  S. Shet, K.-S. Ahn, N.M. Ravindra, Y. Yan, T. Deutsch, J. Turner, and M. Al-Jassim
Effects of Process Conditions for Preparation of Microcellular Foam Zinc Materials by Electrodeposition
Q. Tian and X. Guo

Energy Storage: Materials, Systems, and Applications
Symposium Organizers: Zhenguo "Gary" Yang, Imre Gyuk, Arumugam Manthiram, Christopher Johnson, Jun Liu, Peter Tortorelli, Prashant Kumta, and Arianna Morales

Li-Ion Batteries for Transportation Applications I
Fullerene Film as a Coating Material for Silicon Thick Film Anodes for Lithium Ion Batteries
A.A. Arie and J.K. Lee

Novel Batteries for Stationary Applications
R&D Activities of Redox Flow Battery for Energy Storage at DICP
H.M Zhang and Y. Zhang

Effects of Zirconia Additions on the Toughness and Conductivity of Beta
J. Fergus, A. Upadhyaya, H. Gale, and R. Zee

Fuel Cells: Materials, Processing, Manufacturing, Balance of Plant and Systems Operation

Electrolytes I
Y-Doped Bismuth Niobate (Bi_{0.79}Nb_{0.21}O_{1.71}) Electrolytes for SOFC
C. Weng and W.C.J. Wei

Corrosion and Degradation
Planar SOFC Anode Material Reliability Model Exposed to Phosphine
G. Iqbal, H. Guo, and B. Kang

Quantifying the Interfacial Strength of Oxide Scale and SS 441 Substrate Used in SOFC
W.N. Liu, X. Sun, E. Stephens, and M. Khaleel

Thermal Cycling Effects on the Oxide Scale Formation of Fe-Cr Alloys for SOFCs
T. Horita, M. Yoshinaga, H. Kishimoto, K. Yamaji, M. Brito, Y. Xiong, and H. Yokokawa

Electrodes I
Effects of PH3 Contaminant on SOFC Performance and Related Anode Surface Temperature Measurements
H. Guo, G. Iqbal, and B. Kang

Electrodes II
An Integrated Macro-Micro Model for Solid Oxide Fuel Cells with a Functionally Graded Anode
R. Flesner and G.Y. Kim

Fabrication and Characterization of Thin Film La_{0.6}Sr_{0.4}Co_{0.2}Fe_{0.8}O_{3-δ} (LSCF) and La_{0.6}Sr_{0.4}Co_{0.2}Fe_{0.8}O_{3-δ}-Ce_{0.8}Gd_{0.2}O_{1.9} (CGO) Composite Cathodes
B. Angoua and E. Slamovich
Analytical Modeling of Triple Phase Boundary Length in Composite Cathodes for Solid Oxide Fuel Cells .......... 381
A.M. Gokhale, S. Zhang, and M. Liu

Electrolytes II

YSZ Thick Film Prepared via Filter Coating ........................................................................................................... 388
R. Marcomini, L. Villas-Boas, and D. de Souza

General Poster Session

Environmental and Energy Issues

Effects of Activator on Compressive Strength of Fly Ash-Based Geopolymers .................................................. 400
D. Wang, Y. Hou, Q. Li, and P. Cheng

New High-Energy Non-Carbonaceous Fuel (Non-Expensive Solution of the Global Warming Problem) ................. 410
N.Y. Gosin, E.N. Litvinov, I. Ivakhnenko, and S. Dessiatoun

Silicone Cookware as an Alternative Drying Vessel for Barium Titanate Production ........................................... 416
E. Walton, and S. Pilgrim

Extraction of Platinum Group Metals and Molybdenum from Molten Borosilicate Glass Using Cu and Cu5Si .......... 428
K. Uruga

Phase Transformation and X-Ray Diffraction Studies of Li-Based Complex Hydrides after Pressure Cycling .......... 435
W. Chien, J.H. Lamb, and D. Chandra

Carbon Modified (CM)-N-TiO2 for Efficient Water Splitting to Hydrogen and Oxygen Gas under Solar Simulated Light Illumination ................................................................................................................. 442
M. Frites and S. Khan

Effect of Pressure on the Structural and Electrical Characteristics of Tl0.8Sb0.2Sr2Ca2Cu3O6.5 Superconductors Prepared by Solid State Reaction Technique ................................................................. 451
K.A. Jasim, Ibn-Al-Haithem, and T.J. Alwan

Research on Air-Conditioning-Type Building Materials .......................................................................................... 461
Y. Ma, Y. Li, B. Zhu, and K. Zhang

Pozzolanic Reactivity and Reaction Kinetics of Fly Ash ......................................................................................... 470
B. Zhu and Y. Ma

Highly Efficient Comprehensive Utilization of Kaolin Tailings from Suzhou ............................................................. 480
Z. Zhang and W. Wang

Fundamentals & Characterization

ACerS Sosman Award Symposium
Symposium Organizers: David Saylor and Shen Dillon

Three-Dimensional Structure of Interfacial Networks

Diffraction Contrast Tomography of Polycrystalline Alumina .................................................................................. 489
T.J. Marrow, A. King, P. Reischig, S. Rolland du Roscoat, and W. Ludwig
Charles R. Morin Memorial Symposium on Failure Analysis and Prevention
Symposium Organizers: Ronald Parrington and Dennis McGarry

Analysis of Failures in Ceramics and Glass
Degradation of Consumer Products Glasses after Extended Use .......................................................... 500
  R. Dugnani, Z. Pan, and M. Wu

Failures Involving Fatigue or Fracture I
Case Studies in Failure Analysis: From Civilian Structures to Dies and Tooling, Lessons Learned ............. 510
  M. Krishnadev, E. Ghali, C. Lincourt, C. Blais, and M. Larouche

Analysis of a Bucketwheel Stacker Reclaimer Structural Failure .......................................................... 521
  L.S. Araujo, L.H. de Almeida, and E.M. Batista

Tools and Techniques for Failure Analysis
Artificial Intelligence Tools for Failure Event Data Management and Probability Risk Analysis for Failure Prevention ................................................................. 529
  J. Fong and P. Marcal

Operational Safety Assessment of 1940s Cast Steel Pulleys ................................................................. 541
  D. Firrao, P. Matteis, and P. Russo

Failures Involving Fatigue or Fracture II
High Temperature Failure of Expansion Joints Due to Stress Relaxation Cracking ......................................... 550
  E. Barbareschi, P. Guarnone, A. Giostra, and M. Zappaterra

Failure Analysis of Truck Wheel Studs .......................................................................................................... 557
  S. Yang and B. Cook

New Roles for Electric and Magnetic Fields in Processing, Microstructure Evolution, and Performance of Materials
Symposium Organizers: Rishi Raj, Rustum Roy, and Dinesh Agrawal

A New Era for Materials Science
The Birth of a New Field of Materials Science: Resonant Polarized Radiation Interactions with Matter .......... 563
  R. Roy and M.L. Rao

Einstein’s Hidden Variables: Part A – The Elementary Quantum of Light and Quantum Chemistry and Part B – The Resonance Factor ............................................................. 573
  J. Brooks

Induced Ultra-High Frequency Ultrasonic Vibration as the Driving Force for Reported Sub-Thermal Microwave Effects on Materials .................................................................................. 597
  B.C. Towe

Effects of External Imposed and Internally Generated Electric Fields II
The Electric Discharge Compaction of Porous Anodes .................................................................................. 608
  E. Grigoryev
Biological and Health Effects of EM and Acoustic Radiation

Nanotechnology, Health and Longevity ................................................................. 616
C.N. Shealy

Structural Changes and Health Effects of Water Modified by a Microwave Resonant Polarized Field .......... 621
S. Sedlmayr

Novel Phenomena Related to Electric, Magnetic and Acoustic Fields I

Effects of Intensity and Polarization of Microwave Field in High-Temperature Processing of Nanostructured Materials ....................................................................................................................... 632
K.I. Rybakov, Yu.V. Bykov, S.V. Egorov, A.G. Eremeev, V.V. Kholoptsev, V.E. Semenov, and A.A. Sorokin

New “EM” and Human Intentions as Polarized Vector Fields

Survey of Novel Directed Microwave Fields on Condensed Matter ................................................................. 644

Dramatic Structuring of Liquid Water using Polarized Microwave, Radiofrequency Radiation, and Crystal-Induced Epitaxy ................................................................. 655

Hutchison Effect Metal Samples: Description and Analysis ................................................................. 667
G. Hathaway

Phase Equilibria Symposium in Memory of Dr. Richard Spriggs
Symposium Organizers: Waltraud Kriven, Wai-Yim Ching, Ben Burton, and Doreen Edwards

Experimental Studies of Ceramic Phase Equilibria

Phase Equilibria in Spinel Coatings for Solid Oxide Fuel Cell Interconnects ................................................................. 679
J. Fergus, K. Wang, and Y. Liu

Recent Advances in Structural Characterization of Materials
Symposium Organizers: Zhonghou Cai, Roumiana Petrova, and Jacob L. Jones

Spectroscopic Techniques: Developments and Applications

Characterization of Thin Films by XAFS: Application to Spintronics Materials ................................................................. 688
S. Heald, T. Kaspar, T. Droubay, and S. Chambers

Structural Characterization of Long-Term Ordered Semiconductors ................................................................. 698
S. Pyshkin, R. Zhitaru, J. Ballato, G. Chumanov, and M. Bass

X-Ray and Neutron Diffraction: Developments and Applications V

Study of Oxide Scale and Carburization by Synchrotron X-Ray Microbeam ................................................................. 710
Z. Zeng, K. Natesan, and Z. Cai

Other Techniques: Developments and Applications II

Adhesive Bondability of Advanced High Strength Steels with Galvannealed Zinc Coating ................................................................. 722

Electron Beam Induced Carbon Deposition Using Hydrocarbon Contamination for XTEM Analysis ................................................................. 750
J.S. Luo, C.S. Sung, W.S. Hsu, L.Y. Huang, and J.D. Russell
Structural Transitions and Local Deformation Processes
At and Near Grain Boundaries
Symposium Organizers: Thomas Bieler, Stephen W. Banovic, Rozaliya Barabash, and Martin Harmer

Damage

Evaluation of Creep Damage of Ni-Base Superalloy by Analyzing Crystal Orientation Using EBSP Method ..... 760
R. Takaku, D. Saito, and Y. Yoshioka

Boundary Motion and Thin Films

Mechanisms in Creep and Hot Working to High Strain; Microstructural Evidence, Inconsistencies
Part I: Substructure Evolution; Grain Interactions .................................................................................................... 771
H.J. McQueen

General Poster Session

Fundamentals and Characterization

Long-Term Ageing Behaviour of Stainless Steel Cast Alloys .................................................................................. 797
B. Sustarsic, J.V. Tuma, M. Jenko, and N. Gubelj

Evaluation of Thermal Analysis, Morphology and FT-IR Study of Polypropylene
Filled with Wollastonite and Silicon Rubber ........................................................................................................ 806
U.P. Singh and B.C. Ray

Microstructures and Properties of Simulated Different Regions in HAZ of Copper-Bearing Steel .......... 818
W.Y. Liu, J.B. Liu, Z.J. Deng, T. Gong, and G.L. Yuan

Grain Refinement of Nickel Powder Particles Impacted at High Velocity ......................................................... 824
Y. Zou, W. Qin, S. Yue, J.A. Szpunar, E. Irissou, and J. Legoux

Trials of a Novel Approach for the Analysis of Impedance Spectroscopy .......................................................... 831
S. Hershkovitz, S. Baltianski, Y.D. Horev, D.R. Lewin, and Y. Tsur

Study on Synthesis Mechanism of Magnesium Ferrite by Non Isothermal Kinetics .......................................... 838
J. Li, Q. Wang, and N. Shen

High Pressure Raman Spectra and X-Ray Diffraction Studies on Thermal Energy Storage Materials –
Tris (Hydroxymethyl) Aminomethane (TRIS) ........................................................................................................ 846
V.K. Kamisetty, W. Chien, D. Chandra, E.D. Emmons, and A.M. Covington

Influence of Gas Flow Rate Ratio on the Structural Properties of a-SiC:H Prepared by
Hot-Wire CVD Technique ......................................................................................................................................... 853
A. Azis and S.A. Rahman

On Equilibrium Phase Diagram of the Iron – Carbon System .............................................................................. 863
E. Sidorov

Hydrogen Embrittlement Failure in Steel Fasteners ............................................................................................... 870
M. Darji

Calorimetric Measurement of the Interface Energy of Pure and Calcium Doped Magnesium Oxide .......... 881
R. Castro, R. Torres, and D. Gouvea
Iron and Steel

Advances in Zinc-Coated Steel Sheet: Processing and Properties
Symposium Organizers: Frank Goodwin and Joseph McDermid

Session I

Effect of Substrate Texture on Coating Phase Formation and Effect of Coating Texture on Coating Formability of Industrially Produced Galvannealed Coated Steels ......................................................... 892
A. Chakraborty and R. Kumar Ray

Thermodynamic Analysis of Selective Oxidation Behavior of Si and Mn-Added Steel during Recrystallization Annealing ................................................................. 901
Y. Suzuki, T. Yamashita, Y. Sugimoto, S. Fujita, and S. Yamaguchi

Session II

Effect of Oxygen Partial Pressure during Annealing on the Selective Oxidation and Galvanizing of a 1.5% Al TRIP-Assisted Steel ................................................................. 913
E.M. Bellhouse and J.R. McDermid

Thermal Spray Coating of Galvanizing Rolls ........................................................................ 925
R. Iyengar and S. Baranovski

Electron Backscattered Diffraction Analysis of Steels
Symposium Organizers: Matthew Merwin and Stuart Wright

EBSD Analysis of Steel I

Differentiating Ferrite and Martensite in Steel Microstructures Using Electron Backscatter Diffraction .......... 933
M.M. Nowell, S.I. Wright, and J.O. Carpenter

New Method of Characterizing and Quantifying Complex Microstructures in Steels ....................................... 944

Analysis of HSLA Steel Microstructures by Various Techniques ................................................................. 956
M.J. Merwin, C.T. Becker, and D.R. Giansante

Effect of TMCP Parameters on Microstructures and Low Temperature Toughness for Acicular Ferrite Pipeline Steels ................................................................................. 969
Y.Y. Shan, W. Wang, and Y.K. Wang

Prior Austenite Reconstruction in Friction Stir Processed API X65 Steel Using OIM™ ..................................... 979
M. Abbasi, L.Y. Wei, and T.W. Nelson

Subgrain Texture Evolution during Biaxial Deformation in Interstitial Free and Dual Phase Steels .................. 989
H.N. Han, S.-B. Lee, A.D. Rollett, D.H. Kim, K.H. Oh, and R.A. Lebensohn

EBSD Analysis of Steels II

Microstructure and Microtexture as a Function of Grain Size in a 301LN Stainless Steel .............................. 999
D. Marechal, C. Sinclair, J.-D. Mithieux, and V. Kostoj

EBSD Analysis of Warm Multi-axially Forged Mild Steel .............................................................................. 1008
A.K. Padap, G.P. Chaudhari, S.K. Nath, and V. Pancholi
Inclusions and Clean Steels
Symposium Organizers: Lifeng Zhang, Ronald J. O’Malley, Brian G. Thomas, Hongbin Yin, Kent D. Peaslee, and Les Niemi

Inclusions and Steel Properties: General Session
Optimization of Calcium Treatment to Improve Cleanliness of Cast Steel ................................................................. 1019
V. Singh, S. Lekakh, E. Martinez, and K. Peaslee

Reduction of Slivers due to Nonmetallic Inclusions in Continuous Casting ............................................................... 1031
V. Sanam, P.K. Patra, S. Siddabathula, R. Das, and V. Usharani

Modification of Spinel Inclusions by Calcium in Liquid Steel .................................................................................. 1042
N. Verma, P.C. Pistorius, R.J. Fruehan, W. Noh, and M. Potter

Ladle Metallurgy, Continuous Casting and Nozzle Clogging
Inclusions and Nozzle Clogging during Billet Continuous Casting Process .......................................................... 1054
J. Gao, M. Long, Y. Wang, X. Zuo, and L. Zhang

Behavior of MgO·Al₂O₃ based Inclusions in Alloy Steel during the Refining Process ........................................ 1068
S. Yang, J. Li, L. Zhang, K. Peaslee, and Z. Wang

Experimental Study on RH Vacuum Decarburization for Ultra-Low-Carbon Steels at Baosteel ..................... 1077
Z. Huang, Z. Ma, and H. Hu

Control of Ultra-Low Titanium in Ultra-Low Carbon Al-Si Killed Steel ............................................................... 1082
F. Zhang and G. Li

Modeling on Fluid Flow and Inclusion Motion
Differences between Physical Water Models and Steel Continuous Casters: A Theoretical Evaluation ............... 1090
R. Chaudhary, B.T. Rietow, and B.G. Thomas

Water Model Simulation for Flow State in Slab Continuous Casting Mold ............................................................ 1102

Transient Phenomena of Fluid Flow and Inclusion Motion in Continuous Casting Strands ................................. 1111
Y. Wang and L. Zhang

Investigation of Refractory Properties on the Initial Bubble Behavior in the Water Model of Continuous Casting Process ........................................................................................................... 1123

Modeling and Removal of Inclusions in Continuous Casting ................................................................................... 1132
P. Väyrynen, S. Wang, S. Louhenkilpi, and L. Holappa

The Role of Gas Shrouded Ladle Nozzles in Affecting Steel Quality within a Tundish ............................................ 1144
K. Chattopadhyay, R. Guthrie, and M. Isac

Inclusion/Precipitate Engineering and Inclusion Evaluation
An Overview of Recent Developments in Experimental and Numerical Studies for the In-Situ Measurement of Large Inclusions (~50-400 Microns) in Liquid Steel Processing Vessels ........................................ 1163
R.I.L. Guthrie, X. Wang, M. Isac, R. Conti, and R. Stone

Application of Oxide Metallurgy (OM) to Improving HAZ Toughness of High Strength Steels .................... 1175
K.-S. Oh, W.-Y. Cha, J.-Y. Yoo, J.-Y. Cho, and J.-M. Park

Development of Process Technology for Control of Thick Sulphide Inclusions in Sulphur Bearing Steel .......... 1187
K. Kumar Keshari and S. Kumar Samanta
Processing, Microstructure, and Properties of Cast, Forged, and Specialty Steels

Symposium Organizers: Srinath Viswanathan, Ian Dempster, Rajiv Shivpuri, Von Richards, and Malcolm Blair

Wrought Steels

A Study of Micro-Cracks in Overheated Forgings of Ultra-Low Sulfur Steels for Aircraft Engine Crankshafts ........................................... 1192
J.M. Barsom

Corrosion and Property Comparison of Ultra-High Strength Alloys ............................................................................................................. 1204
D. Wert and T. Werley

Overheat Forging Studies of Ultra-Low Sulfur Steels ................................................................................................................................. 1216
R. Hinton

Effect of the Imposition of Compressive Stress on a Remaining Fatigue Life .......................................................................................... 1226
J.-S. Jung and H.-S. Lee

Study on Ti-Bearing Low Carbon Bainitic Steel with 900 MPa Yield Strength .................................................................................. 1232

Cast Steels

Combined Effect of Boron, Titanium and Rapid Solidification on Microstructure of Alloy 800 ................................................................. 1238
A.K. Bhargava, A.N. Tiwari, and C.P. Sharma

High-Temperature Properties of Steel L245MB during Slab Continuous Casting Process ........................................................................ 1247

Calculating Model Establishing and Application of Nitriding and Denitriding to 304 Stainless Steel in AOD ........................................... 1256
C.F. Shen, Q.L. Shi, Y. Li, and Z.H. Jiang

A Simple Model on Dendrite Growth during Steel Continuous Casting Process ......................................................................................... 1264
W. Guo, L. Zhang, and M. Zhu

Structures of Horizontally Continuously Cast Steel Billets ...................................................................................................................... 1276
P. Chaengkham and P. Srichandr

Steel Processing, Product and Applications Symposium

Symposium Organizer: Riad Asfahani

General Session – Steel Overview

Different Hot Working Behaviors Did Not Impede Transition from Wrought Iron to Steel – Explanations, International Histories ................................................................. 1283
H.J. McQueen

Sheet Steels I

Development of New Steel Grades by Experimental Simulation ........................................................................................................... 1294

Effects of Cooling Rate, and Cool Deformation on Mechanical Properties and Microstructure of a Hot Rolled Nb-Microalloyed Steel ......................................................... 1308
S.H. Mousavi Anijdan, M. Sanjari, and S. Yue

Fracture Mechanical Study on Edge Flangebility of High Tensile-Strength Steel Sheets .................................................................. 1317
Y. Takahashi, O. Kawano, Y. Tanaka, and M. Ohara
Effect of Holding Time before Cool Deformation on Microstructure Evolution and Mechanical Properties of Microalloyed Steels ................................. 1329
S.H. Mousavi Anijdan, A. Rezaeian, and S. Yue

Temper Resistant 1600 MPa / 8.7% EL AISI 1020 Flash Bainite Processed Steel Made in 5 Seconds .............. 1337
G. Cola, Jr.

Simulating Fabrication of Advanced High Strength Steel Tubes Using Press Forming and High Frequency Induction Welding .................................................. 1346
M. Rashid and P. Martin

Sheet Steels II

Formability of Advanced High Strength Steels Determined by Instrumented Hole Expansion Testing .......... 1358
A. Karelova, C. Krempaszky, M. Dünckelmeyer, E. Werner, T. Hebesberger, and A. Pichler

Dynamic Recrystallization of a Nb Bearing Al-Si TRIP Steel ........................................................................ 1369
R. Zubialde, P. Uranga, B. López, and J.M. Rodriguez-Ibabe

The Effect of Carbon Content on the Microstructure and Mechanical Properties of High-Mn Steels .......... 1381
E. Yang, H. Zurob, and J. McDermid

Effects of Heat Treatment on Microstructure and Mechanical Properties of Bainitic Single- and Complex-Phase Steel ...................................................... 1391
F. Hairer, C. Krempaszky, P. Tsipouridis, E. Werner, K. Satzinger, T. Hebesberger, and A. Pichler

Influence of Cooling Rate on Microstructure Evolution in a Low Carbon High Strength Microalloyed Dual Phase Steel ........................................................... 1402
R. Wei, X.F. Mao, X.L. Tao, K.M. Wu, L.D. Yao, and Z.G. Li

Microstructural Evolution and Strain-Hardening of Fe-30Mn during Tensile Deformation ............................ 1412
X. Liang, J.R. McDermid, J.D. Embury, X. Wang, H.S. Zurob, and O. Bouaziz

Research into an Original 600MPa Galvanizing Dual Phase Steel with High Amount of Aluminum .......... 1423
H. Wang, W.Y. Liu, D.Z. Zhong, and C.J. Lin

Stainless and High Alloy Steels

Effect of Matrix Composition on the Corrosion Resistance of Martensitic Stainless PM Tool Steels ........ 1432
M. Sawford, A. Kajinic, A. Wojcieszynski, and J. Eckenrod

Gallium Content Effects in Low Carbon Steels .......................................................................................... 1442
M. Brooks, E. Summers, and T.A. Lograsso

Thin-Walled, Low-Alloy Steel Structures Produced Through the Gas Carburization of Fully Reduced Metal-Oxide Powder Mixtures ........................................ 1454
L. Cerully, T.H. Sanders, Jr., and J.K. Cochran

Influence of Heat Treatment on the Corrosion and Electrochemical Behavior of Austenitic Stainless Steel ... 1465
M. Sadawy, T. Shirinov, R. Heseinov, and H. Tahirlu

Comparing the Up Quenching Austempering with Conventional Austempering on Mechanical Properties of an Ultra High Strength Steel ..................................... 1475
S.M. Safi

Modelling of Rolling and Cooling

Mathematical Description of α'-Martensite Formation and its Application for the Detection of Damage in Sheet Metal ................................................................. 1485
B.-A. Behrens and K. Weilandt
Infrared Thermography of a TMCP Microalloyed Steel Skelp at the Upcoiler ................................................................. 1497
J.B. Wiskel, H. Deng, H. Henein, and C. Jefferies

The Development of Optimum Modes in Rolling and Postdeformation ........................................................................... 1509
B.P. Sereda, A.N. Tumko, I.V. Krugljak, and A.K. Kovalenko

Unsteady State Hardness Prediction of Industrial Quenched Steel Bar [One and Two Dimensional] .......................... 1514

Tribute to Professor Edmonds I

Development of Vanadium Microalloyed High Strength Hot Strip for Production with Reduced Rolling Forces ................................................................. 1521
D.J. Milbourn and Y. Li

The Formation of Abnormal Ferrite in Hypereutectoid Steels Revisited and Its Analogy to the Formation of Austenite and Ferrite Shells Around Graphite in Cast Irons ................................................................. 1532
T. Chairuangsri and D.V. Edmonds

Bainitic Hot Strip Steels Microalloyed with Vanadium ............................................................................................. 1543
T. Siwecki, J. Eliasson, R. Lagneborg, and B. Hutchinson

Effect of Si, Al and Mo Alloying on Tensile Properties Obtained by Quenching and Partitioning ............................ 1554
E. De Moor, J.G. Speer, D.K. Matlock, C. Föjer, and J. Penning

Microstructure and Mechanical Properties of Ni-Added High Strength Steels Subjected to Quenching and Partitioning (Q&P) Heat Treatment ................................................................. 1564
A.R. Martins, F. Rizzo, D. Coelho, J.G. Speer, D. Matlock, K. He, and D. Edmonds

Tribute to Professor Edmonds II

A Tribute to Professor David V. Edmonds on the Eve of His Retirement ................................................................. 1575
J.G. Speer and H.K.D.H. Bhadeshia

Particle Stimulated Nucleation of Ferrite in Microalloyed Steel ............................................................................. 1591
C.I. Garcia, M. Hua, A.J. DeArdo, and K.A. Hajeri

Isothermal Transformation of CMnSi and CMnSiAl Steels in the Ms-Mf Temperature Range ................................. 1603
D.H. Kim, J.G. Speer, H.S. Kim, and B.C. De Cooman

Steel Process Technology

New Rail Steels for the 21st Century ................................................................................................................................. 1614

Effect of Ti on Charpy Fracture Energy and Other Mechanical Properties of ASTM A 710 Grade B Cu-Precipitation-Strengthened Steel ................................................................. 1625
S. Vaynman, Y-W. Chung, M. Fine, and R. Asfahani

Weld HAZ Simulation of X100 Pipe Steel .................................................................................................................... 1633
G. Goodall, M. Brochu, J. Gianetto, and J. Bowker

The Effect of Processing Conditions and Cooling Rate on API X-70 and X-100 Grade Steels .............................. 1644
M. Salem, S.M. Al Muaili, and E.J. Palmiere

Weldability of a 700MPa Grade Low Carbon Bainitic Steel Produced by CSP ................................................................. 1652
R. Wei, K.M. Wu, G.H. Jiao, and D.Z. Wen

Microstructural Evolution and Grain Refinement of a High Strength Low Alloy Steel Produced by Compact Strip Production ................................................................................................................. 1659
Full Scale Combined Load Premium Connection Testing in an H₂S Environment .............................................. 1664
    S. Herod, R. Sivley, A. Romero, P. Kis, and J. Heseltine

Fatigue and Fracture

Analysis of Criterion for Ductile Crack Initiation of High Strength Steels under Cyclic Loading ...................... 1676
    H. Sueyoshi, N. Ishikawa, and M. Ohata

Effect of Inclusion Morphology on the Fracture Toughness of High Strength Steels ........................................ 1687
    C. Lincourt, M. Krishnadev, and J. Lanteigne

Effect of Inclusions on Machinability of Carbon Steels for Machine Structural Uses ..................................... 1699
    K. Watari and J. Fujiwara

General Poster Session

Iron and Steel

Acicular Ferrite Formation and Mechanism Aspects of a HSLA Steel ................................................................. 1708
    Y.T. Chen, Z. Gui, and G. Luo

Degenerate Pearlite and M-A Constituent Formation in the Simulated Coarse-Grained Heat Affected Zone of a C-Mn HSLA Steel .............................................................................................................. 1718
    Y.T Chen and C.M. Zhu

Development of Penstock Steel with Excellent Weldability for Hydroelectric Power Station .............................. 1729

Reversing Design Methodology of Investment Casting Die Profile based on Simulation Files of ProCAST ...... 1739
    Y.Q. Dou, B. Kun, Y.W. Dong, and K. Tian

Development of Steels with Advanced Damping Properties ..................................................................................... 1747
    Zh. Zhumadilova, D. Suleyev, and J.J. Moore

Using Simulated Cooling Profile from Computational Simulation Technique for Chilled Structures Prediction in Thick Section Casting ........................................................................................................ 1756
    T. Korad, T. Harnwirojkun, M. Ponboon, and U. Phongsophitanan

3D Modelings of White Iron Reinforcement in Mottled Iron Castings ................................................................. 1766
    T. Korad, M. Ponboon, and U. Phongsophitanan

Materials and Systems

Characterization of Metal Matrix Composite Materials
Symposium Organizers: Carl Boehlert and Iwona Jasiuk

Modeling and Mechanical and Physical Behavior

Multi-Scale Characterization and Modeling of Chromium Carbide based Cermets .............................................. 1775
    I. Jasiuk, E. Hamed, and I. Hussainova

Behaviour of Metal Matrix Syntactic Foams in Compression ................................................................................. 1785
    Y.Y. Zhao and X.F. Tao

Mechanism Controlling Thermal Conductivity and Coefficient of Copper Metal Matrix Composites .............. 1795
    D. Esezobor and S. Fatoba

The Physical and Mechanical Properties of Cu/Al₂O₃ Composite Synthesized by Internal Oxidation .......... 1806
    A.M. Soleimanpour, P. Abachi, N. Alimardani, and A. Motamen
Homogeneity of SiC Particle Distribution on Al/SiC-Al/Al₂O₃ Laminate Hybrid Composite .................................................. 1816

Widyastuti, M. Zainuri, and Anne Z.

Nanocomposites and Wear

New Class of Metallic Nanocomposites – NanoCarbon Metals .................................................................................. 1828

R. Scherer, J. Shugart, and K. Lafdi

The Effect of Aging Heat Treatment on the Wear Behavior of Copper Aluminum Alloys and Its Stainless Steel Fiber Composites .......................................................... 1836

M. Gouda, A.A. Hussein, E. Elbana, and M. Ramadan

Synthesis and Fabrication

Fabrication and Thermal Properties of Copper-Based Composites .................................................................................. 1848

C.A. León-Patiño, G. Rodríguez-Ortiz, and E.A. Aguilar-Reyes

Fabrication and Characterization of Squeezed Cast Aluminum Matrix Composites Containing Boride Reinforcements .................................................................................. 1856

L. Olaya-Luengas, E. Estremera-Pérez, and O.M. Suárez

Manufacture Aluminium-Bismuth Foams .................................................................................................................. 1866

K. Nyirenda

Analysis of Metal Oxide Deposition on the Surface of SiC Particle by Electroless Plating on Al/ SiC₃p Composite ........................................................................................................ 1877

M. Zainuri, Widyastuti, and Anne Z.

Aluminum Matrix Composites Mechanical Behavior

Simulations of Mechanical Response of Complex Three-Dimensional Microstructure of SiC Particles Reinforced Al-Alloy Using Realistic Microstructure .................................................. 1889

A. Sreeranganathan, Y. Mao, H. Singh, and A.M. Gokhale

Effect of Sc and Zr Addition on Strengthening of Al-B₄C Composites at Elevated Temperatures ....................... 1898

J. Lai, Z. Zhang, and X.-G. Chen

Microstructure and Fluidity Evolution of Recycled Materials of Al-B₄C Metal Matrix Composites ................ 1908

C.-J. Shi, Z. Zhang, and X.-G. Chen

Improving the Strength and Ductility of Wrought Aluminum through Particle Addition .................................. 1918

S.O. Adeosun, S.A. Balogun, O.S. Sanni, and W.A. Ayoola

Effects of Deformation and Heat Treatment on Mechanical Properties of AA6063 Aluminum Alloy Reinforced with Barite Particles ............................................................... 1929

S.O. Adeosun, S.A. Balogun, O.O. Obembe, D.O. Okanigbe, and A.O. Omoaye

Environmental Degradation and Protection of High Temperature Alloys

Symposium Organizers: Xingbo Liu, Mark Weaver, Anthony Banik, Akane Suzuki, and Art J. Schroeder, Jr.

High Temperature Oxidation

High Temperature Corrosion of Some Superalloys in the Presence of MgO as an Oxide Additive ...................... 1939

Gitanjaly, H. Singh, and S. Prakash
Coatings and Protections

A Multiscale NDT System for Damage Detection in Thermal Barrier Coatings
A.M.G. Luz, D. Balint, and K. Nikbin
1951

New Technologies for Coping with Increasing Material Costs
Symposium Organizer: Charles Parker

Session I

Aspects of the Preparation of NdCo5 Intermetallic via the FFC-Cambridge Process
A.M. Abdelkader, D.J.S. Hyslop, A. Cox, and D.J. Fray
1961

Research and Application of Functional Polymer Grinding Aids
D. Wang and Z. Wang
1974

Recent Developments in Handheld X-Ray Fluorescence (XRF) Instrumentation
J. Pasmore
1984

Advanced 3D Data Analysis and Visualization in Aluminum Die Casting Using Computed Tomography
S. Zhang, P. Barthelemy, and J. Noel
1995

Roll Alignment Using Inertial Technology
P.R McCarthy
2007

Structural Materials for Aerospace and Defense: Challenges and Prospects
Symposium Organizers: Roumiana Petrova, Henry White, and Christopher W. Norfolk

Session I

Considerations of Material Selection for Small-Caliber Gun Barrels
S. Kerwien
2012

Structural Materials for Aerospace and Defense: Challenges and Prospects
L.B. Rosa and F.D.R. Amado
2022

Session III

Surface Treatment to Increase Metal Fatigue Life
D. Horne
2034

The Effect of Graphitization Heat Treatment Temperature on Thermal Properties of PAN-Based Carbon Fiber Carbon-Carbon Composites in Relation to Microstructure and Fiber Orientation Distribution
S. Iqbal and P. Filip
2045

Shaped Metal Deposition of Ti: Microstructure and Mechanical Properties
B. Baufeld, A.K. Swarnakar, O. Van der Biest, and R. Gault
2057

The Processes Research of Structurization of Titan Aluminides Received by SHS
B. Sereda, A. Zherebtsov, and Y. Belokon
2069

Session IV

Influence of Strain Rates on Deformation Mechanism of Duplex TiAl Intermetallics
X. Zan, Y. Wang, Z.X. Lu, Y.H. He, and Y.M. Xia
2074
Surface Protection for Enhanced Materials Performance
Symposium Organizers: Rodney Trice, Daniel Mumm, Dongming Zhu, Hua-Tay Lin, Pravansu Mohanty, and Yutaka Kagawa

Tribology Coatings I

Friction and Wear Properties of Duplex and TRD Coated Steel against Cemented Tungsten Carbide ................................. 2081
F. Fazlalipour, M. Niki Nushari, N. Shakib, and A. Shokuhfar

Characterization of Laser Clad CPM 15V Tool Steel on Pre-Hardened H13 Substrate ......................................................... 2090
J. Chen, L. Xue, H. Visscher, and J. Wolfe

Tribological Behavior of Ni-P and Ni-P-Al2O3 Composite Coatings on Steel Substrates ..................................................... 2102
C.A. León-Patiño, J. García-Guerra, and E. Bedolla-Becerril

Characterization of Nano Crystalline Lubricant Coating to Study the Effect of Grain Size and Phase Structure on the Coating Behavior ................................................................................................................................. 2111
N. Gitis and V. Khosla

Chemical Interaction between Silicon-Fluorine Gas Species and 316 L Stainless Steel in Argon Atmosphere ............ 2115
E. Gamón, M.I. Pech-Canul, J. López-Cuevas, A.L. Leal-Cruz, and M.A. Pech-Canul

Tribology Coatings II

The Copper Alloys Rolling with Protective Coatings, Received by the Self-Propagating High-Temperature Synthesis (SHS) .................................................................................................................................................. 2125
B. Sereda and A. Zherebtsov

Environmental Coatings

Hot Corrosion Behavior of Alumina Titania Coatings in Molten Sodium Sulphate-Vanadium Pentoxide Environment ........................................................................................................................................................................... 2130
P.K. Sapra, S. Singh, and S. Prakash

Stability of Chromium Oxide and MnCr2O4 Spinel in High Temperature Carbonaceous Environments with Varied Oxygen Partial Pressures ........................................................................................................... 2136
H. Li and W. Chen

Alternate Coating Methods

About Influence of Process Nucleation Titanium on Cathode at Its Current Efficiency ......................................................... 2148
A. Putilin

General Poster Session

Materials and Systems

Microstructure and Wear Resistance of FCC Al0.3CoCrFeNiC4 High Entropy Alloys .............................................................. 2154
T.-T. Shun and Y.-C. Du

Corrosion Behavior of Aluminum Matrix Composite (AMC3) Prepared by Atomization .......................................................... 2161
M. Abbass, M. Waheed, and A. Faris

Properties of Multi-Component CrBMoS Coatings by Pulsed Magnetron Sputtering from Powder Targets .... 2173
Y.W. Zhou, Z. Zhao, C.Y. Zheng, and P.J. Kelly

The Corrosion Protective Effectiveness of Metal Coated Steel Reinforcement in Concrete ................................................. 2181
Nanotechnology

Synthesis, Microstructural Characterization, Mechanical Properties and Physical Properties of Nanolaminated Ternary Carbides
Symposium Organizers: Sylvain Dubois and Miladin Radovic

MAX Phases Synthesis and Reactivity

Hydrothermal Oxidation Behavior of Layered Machinable Carbides Ti₃SiC₂ and Ti₃Si₀.₉Al₀.₁C₂
H.B. Zhang, K.G. Nickel, and C. Zhou

General Poster Session

Nanotechnology

Preparation of Ti₃AlC₂ and Ti₂AlC Powders by SHS Method
L. Chlubny, J. Lis, and M.M. Bucko M.

Nanocrystallization of a-Si:H Thin Films Deposited by PECVD under Low Argon Dilution
Z. Li, W. Li, Y. Jiang, H. Cai, and Y. Gong

Processing & Product Manufacturing

Emerging Material Forming Technologies
Symposium Organizer: Muammer Koc

Session I

Application of Acoustic Emission to Monitor Forging Processes of Magnesium Alloys under Superimposed Hydrostatic Pressure
I. El-Galy, I. Pfeiffer, and B.-A. Behrens

Comparison of Deformation Behavior in Mandrel Bending of Steel Pipe and Aluminum Pipe
R. Hirayama, T. Yamakawa, and H. Naoi

FEM-Simulation of Long Term Die Heating during High-Frequency Incremental Hot Forging Processes
T. Hatzenbichler, S. Wallner, B. Buchmayr, P. Prevedel, and D. Caliskanoglu

The Incremental Forming Approach based on the Modified Classical Orbital Forging Technology
J. Nowak, L. Madej, M. Pietrzyk, F. Grosman, S. Ziółkiewicz, and A. Plewiński

Session II

Effect of Gun Traverse Speed on Microstructure and Bond Strength of Cold Sprayed Ti₆Al₄V and Ti Coatings
A. Rezaeian, W. Wong, S. Yue, E. Irissou, and J.-G. Legoux

Effect of Non-Linear Strain Paths on the Forming Limit Diagram of AHSS
A. Mackensen and H. Hoffmann

Effect of Gas Temperature on the Microstructure and Properties of Cold Sprayed Copper Coatings
Y. Zou, A. Rezaeian, W. Qin, S. Yue, J.A. Szpunar, E. Irissou, and J. Legoux

Experimental Investigations on the Material Behavior and Formability of Magnesium AZ31 Sheet under Warm Hydroforming Conditions
S. Mahabunphachai and M. Koç
Low-Cost Manufacturing of Fuel Cell Bipolar Plates by Electromagnetic Forming
J. Shang, L. Wilkerson, S. Hatkevich, G.S. Daehn, S. Srinivasan, H. Wang, and J.R. Bradley

Forming of Light Weight Materials
Symposium Organizers: Mark Stoudt, Arianna Morales, and Adam Creuziger

Forming Advanced Automotive Alloys
Optimization of Tube Hydroforming Using Pulsating Internal Pressure
H. An, D.E. Green, and J. Johrendt
Hot Gas Forming of Magnesium Tubes Produced by Bridge-Die Extrusion
P. Martin, M. Rashid, and R. Canaj

Analysis on Deformation Characteristics of Aluminum Thin-Wall Tubes Axially Compressed by Internal Pressure

Characteristic of Axial Compression for Thin-Wall Tubes Filled with Powder
M. Okabe, M. Yoshida, H. Naoi, and S. Yamazaki

Characterization of Automotive Alloys II
Manufacture and Characterization of Magnesium Foams for Ultra-Lightweight Applications
T. Plorin, D. Bormann, and Fr.-W. Bach

New Approaches for Automotive Lightweighting
The Effect of Grain Refining of Primary Phases on the Fluidity of Al-Si Casting Alloys
O. Adefuye
The Effects of Solidification under Pressure on the Microstructural and Mechanical Properties of Cast Aluminum Alloys
S. Ghanti, E. Druschitz, A. Druschitz, and J. Griffin

Fundamentals, Applications, and Innovations in Heat Treatment
Symposium Organizers: Srinath Viswanathan, Fred R. Specht, and David Milam

Process, Process Control, and Properties
A New Analytical Technique for Heat Treatment Process Control: GD-OES (Glow Discharge Optical Emission Spectrometry)
P. Hunault
Response of Tensile Properties in Age Hardened Al-Si-Mg-Cu Alloys to Microstructure and Solute Distribution Produced by Casting and Solutionizing Processes
Y. Ma, J. Fang, F. Yi, K. Song, H.D. Brody, and J.E. Morral
Simulation of Microstructure and Residual Stress Development in Cylinders of AISI 4140 during Quenching by Spray Cooling and Following Tempering
Z. Yu, F. Nürnberger, T. Gretzki, M. Schaper, and Fr.-W. Bach

Surface Treatment
Determining the Residual Stresses in the Nitrided Layers with X-Ray Diffraction Techniques
A. Zumbilev and I. Zumbilev
Joining of Advanced and Specialty Materials 2009 (JASM XI)
Symposium Organizers: Leijun Li, Norman Zhou, Christopher Smith, Xin Sun, Arianna Morales, J. Hinrichs, and Viola Acoff

Welding Metallurgy

An Update of Phase Transformations during PWHT of Grade 91 .......................................................... 2445
J. Siefert, J. Sanders, J. Tanzosh, B. Alexandrov, and J. Lippold

Effect of Welding Speed on Weld Quality and Microstructure of Tandem Submerged Arc Welded X80 Pipeline Steel .............................................................................................. 2457
H. Farhat, I.N.A. Oguocha, and S. Yannacopoulos

Corrosion Performance of Welds on 6 wt% Mo Superaustenitic Stainless Steels .................................................. 2469
A. Stockdale and J. DuPont

Microstructural Evolution and Mechanical Properties of Welds in a New High Strength Steel .......................... 2477
J. Farren and J. DuPont

The Effect of Welding Speed on the Impact and Tensile Properties of SA516 Grade 70 Steel .................. 2487
J. Amanie, I.N.A. Oguocha, Y. Yang, and S. Yannacopoulos

A Thermal Analysis of Resistance Seam Cladding Corrosion-Resistant Alloys to Steel Substrates .............. 2499
J. Gould

Solid-State Joining

Linear Friction Welding Behavior of Waspaloy ................................................................. 2511
A. Chamanfar, M. Jahazi, S. Yue, J. Gholipour, and P. Wanjara

Power Supply Design for Resistance Spot Welding ............................................................ 2523
M. Salem, L.J. Brown, and J. Lin

Surface Modification and Laser Processing

Investigation of the Electro-Spark Deposition of a Nano-Structured Eutectic Aluminum-Silicon Coating ....... 2535
D. Heard, J. Milligan, and M. Brochu

Surface Modification Techniques for Metallic Implants used in Biomedical Applications ....................... 2542
T.S. Sarao, H. Singh, H. Singh, H.S. Saheet, and R. Chibber

Preventing Dissimilar Metal Weld Failures: Application of New Functionally Graded Transition Joints ........ 2554
G. Brentrup, B. Leister, B. Snowden, J. DuPont, and J. Grenestedt

Brazing

Reactive Wetting between Ag-CuO and Al₂O₃ ........................................................................ 2563
J. Friant, A. Meier, K.S. Weil, and J. Darsell

Welding of Light-Weight Materials

Manufacturing of Lightweight Frame Structures by Joining of (None-) Reinforced Profiles ................. 2573
M. Marré, M. Ruhstorfer, A.E. Tekkaya, and M.F. Zaeh

Friction-Stir Processing (Models)

The Formation Mechanism of the Friction Stir Welds ....................................................................... 2585
L. Xing, L. Ke, C. Huang, and Y. Huang
Survey of Current Modeling Techniques for Friction Stir Welding .............................................................. 2597
D. McClelland

Force Analysis of Friction Stir Welding Process Using a Cylindrical Tool .......................................................... 2605
S. Muthukumaran

Micro/Nano-Joining II
Freeform Fabrications of Metal and Alloy Components with Structural and Compositional Distributions through Micro Welding Tectonics ......................................................................................... 2617
S. Kirihara, Y. Takinami, Y. Yamamoto, and T. Horii

Solid-State Joining of Multifilamentary Bi-2223/Ag Superconducting Tapes .............................................................. 2627
G.S. Zou, W. Guo, Y.N. Zhou, A.P. Wu, and F.B. Zhou

Preparation of Nanocrystalline PbS Thin Films by Chemical Bath Deposition .............................................................. 2637
M. Abass, E. Al-Fawadi, and A-K. Al-Samraee

Pb-Free, Pb-Bearing Joining and Packaging Materials and Processes for Microelectronics
Symposium Organizers: Andre Lee and C. Robert Kao

Electromigration and Reactions in Solders
Effect of Thermal Treatments on Copper Dissolution of SAC 305 Solder .................................................................. 2647
L. Nielsen, T. Ryno, D.J. Medlin, C. Voyles, and S. Richards

Powder Metallurgy Processing and Products
Symposium Organizers: Andrzej Wojcieszynski, Howard A. Kuhn, Jogendhar Sing, Marvin G. McKimpson, and Pavan Suri

Powder Production, Handling and Characterization
Pressure Drop Behavior of Porous Preforms with Multimodal Distributions with Irregular-Shape SiCp .......... 2659
M. Montoya-Dávila, M.I. Pech-Canul, M.A. Pech-Canul, J.C. Rendón-Angeles, and J. López-Cuevas

Advanced Sintering/Consolidation Processes
Nanostructured Al-Si Surface Coatings Using Spark Plasma Sintering ................................................................. 2667
J. Milligan and M. Brochu

Properties and Microstructure of PM Products
Preparation and Characterization of Iron-Copper Metastable and Nanocrystalline Alloy Prepared by Mechanical Alloying ...................................................................................................................... 2675
M.S. Siddiqui and S. Bhargava

Effects of Fiber Size and Aging on the Mechanical Properties of NiTi Short Fiber and SiC Particle Reinforced Al6061 Composite ............................................................................................................ 2681
Z. Chaudhury, M. Hailat, and G. Newaz

A New Approach towards Characterization of Porosity in Sintered Steels .............................................................. 2689
V. Dehnavi, M. Makarem, and E.Z.V. Karimi
Manufacturing Fully Dense Products

The Challenges of Micro Forming Structural Components from Powders ................................................................. 2700
  D.F. Heaney and C.V. Shaffer

Emerging Technologies and Processes

Additive Manufacturing of Dense Metal Parts by Electron Beam Melting ................................................................. 2711
  U. Ackelid and M. Svensson

General Poster Session

Processing and Product Manufacturing

Effects of Low Frequency Electromagnetic Field on Surface Quality of 7050 Aluminum Alloy Ingot during Hot-Top Casting Process ......................................................................................................................... 2720
  X.J. Wang, J.Z. Cui, Y.B. Zuo, Z.H. Zhao, and H.T. Zhang

Sulfidizing-Pyrrhotizing Roast of Middling, Mixed, Polymetallic Ores ................................................................. 2726
  T.A. Chepushtanova

An Experimental Investigation into Axial Distribution of Powder in a Heat-Exchange Pipe of a Suspension Preheater .............................................................................................................................. 2734
  W. Liu, D. Xu, Y. Chen, and H. Li

Special Topics

Developments in Web-Based Material Property Databases, Knowledge Management of Materials Information, and Materials Informatics
  Symposium Organizers: Deborah Mies, Ursula Kattner, and Laura A. Lorenzo

Materials Data Content and Management

Development of Web-Based Metal Property and Metal Information Databases ................................................................. 2742
  B. Li

Standards-Compliant Schemas and Ontologies for Materials Test Data ........................................................................ 2754
  T. Austin, C. Bullough, N. Swindells, D. Leal, and S. Higgins

Perspectives for Emerging Materials Professionals:
Early Strategies for Career Development
  Symposium Organizers: Nathan Ashmore, Leonard J. Grant, Emily Kinser, and Ben Poquette

Session I

Improving Your Intellectual Property Portfolio through the Preparation of Better Invention Disclosures and Patent Applications ......................................................................................................................... 2764
  T. Joseph
Status of Metals Engineering Education in the United States

Symposium Organizers: Andrzej Wojcieszynski and Henry R. Piehler

Metals in Engineering Curricula

Back in Black: Innovative Curricular, Outreach, and Recruiting Activities at the South Dakota School of Mines and Technology ................................................................. 2776
  M. West, D. Medlin, J. Kellar, D. Mitchell, S. Kellogg, and J. Rattling Leaf

The Samurai Sword Design Project and Opportunities for Metallurgical Programs ............................................. 2787

General Poster Session

Special Topics

Critical and Strategic Failure of Rare Earth Resources ................................................................. 2798
  J. Kennedy
