4 Silicon Pipeline or Dislocation Defect?
Yann Weber
This paper presents case studies of silicon pipeline defects and dislocations found on mixed-mode technology.

14 3-D Analysis of a Copper Flip-Chip Interconnection Using FIB-SEM Slice and View
Mototaka Ito and Jun Kato
Three-dimensional analysis techniques can be used to detect entrapped filler as well as voids in copper pillar bump joints.

22 Wire Bonding
Lee Levine
This article explores wire bonding's continued growth as the leading semiconductor interconnection method.

30 Plasma FIB Provides Vital Delayering and Site-Specific Failure Analysis Capabilities for Larger-Scale Structures
Surendra Madala
Read about new applications of the PFIB in delayering/deprocessing and site-specific failure analysis.

38 ISTFA 2015 Wrap-Up
A recap of the ISTFA 2015 event includes General Chair James Demarest’s wrap-up as well as a list of the ISTFA Best and Outstanding Papers and Posters. A summary of the Panel Discussion and highlights from the four User Groups can be found online at asminternational.org/web/edfas/news/edfa.

ABOUT THE COVER
“Shock and Awe.” Optical image of an actuator coil wire that had fractured during aging and curing of the encapsulating epoxy. The features observed were secondary shock cracks in the cured epoxy when the wire fractured. Photo by Michael Woo, Raytheon Failure Analysis Lab, First Place Winner in Color Images, 2015 EDFAS Photo Contest.

Author Guidelines
Author guidelines and a sample article are available at edfas.org. Potential authors should consult the guidelines for useful information prior to manuscript preparation.
