Chairman's Message:

Sorry for the late notice, but we have been invited by the Central Virginia Section of ASME to join them for a planned tour of the Keystone Truck and Tractor Museum next week. I have driven by this museum many times in my travels through Richmond, so I look forward to attending this tour next week. If you are an engineer of any stripe, you have to love trucks and tractors! So, if you can come on short notice, please join us.

We had two meetings since our last newsletter. Dr Schmidt, an ASM Fellow, paid us a visit on November 8th and gave a good presentation on Material Technology - Past and Future. Dr. Schmidt also provided our local chapter officers with advice on running a successful ASM chapter. We very much appreciated this visit.

Then on November 30th, Dr. Pond came to Tidewater and spoke to approximately 25 local students about “The Beauty of Crystals: Imperfect Perfection”. As always, Dr. Pond does an excellent job of explaining the complex nature of materials in an interesting and easy to follow presentation for all levels. He clearly loves students and enjoys engaging them with his own fascination of the materials world. We are always grateful for his commitment to our chapter and local students.

In addition to the event below, we have several events coming in February for the annual Engineer week recognition. Please see the list of events planned for February and March, and tentative future events in March and beyond.

About the Presentation:

"Keystone Antique Truck and Tractor Museum is conveniently located just 30 minutes from Richmond, Virginia. Encompassing more than 75,000 square feet, Keystone Antique Truck & Tractor Museum is no ordinary museum. It’s cool, it’s combustive, and guarantees to take you on an exhilarating walk down memory lane.

"Come experience the last century of agricultural heritage incorporating fully restored antique farm tractors, ongoing restoration projects and other farm related equipment. Keystone offers visitors more than the farm with a time warp of antique road trucks, classic cars, vintage gas pumps, oil cans, automotive signage, clocks, advertising posters of yesteryear and so much more!"

Sibley's Bar-B-Q restaurant is on-site and open until 8:00 PM if you would like to have something to eat before heading home.
