

SMST 2019

Shape Memory and Superelastic Technology
Conference and Exposition

May 13-17, 2019

The Bodensee Forum | Konstanz, Germany

Donate now to CASMART's Student Design Challenge

The Shape Memory and Superelastic Technologies Society (SMST) is teaming with CASMART, the Consortium for the Advancement of Shape Memory Alloy Research and Technology, at SMST 2019 Conference & Exposition in Konstanz, Germany for their 3rd Student Design Challenge.

The Student Design Challenge is intended for undergraduate and/or graduate students to consider innovative approaches to developing new materials and hardware using shape memory alloy (SMA) technology. Up to 14 teams with 28 students will have the opportunity to showcase and present their creativity during the CASMART Student Design Challenge.

SMST hopes to help offset the cost of travel for these students to showcase their materials at SMST. With a fundraising goal of \$45,000, we are asking you to consider donating any amount to supporting these emerging Science and Engineering young professionals. Your donation will go directly to the student participants.

- \$15,000 will help offset the cost of travel for 10 students
- \$25,000 will help offset the cost of travel for 16 students
- \$35,000 will help offset the cost of travel for 22 students
- \$45,000 will help offset the cost of travel for 28 students

All donations are tax deductible and our tax identification number is 34-0714532. If you would like to donate to our fundraising efforts please contact John Cerne at john.cerne@asminternational.org.

SMST believes in inspiring young minds to pursue science, math and technology education and careers. These subjects are critical in our economy, so let's work together to raise money to excite students and drive them to fulfilling and productive career paths!
