SMST Members named 2020 ASM Fellows

SMST is pleased to announce that two of its members have joined the newest Class of Fellows. Congratulations to all!

2020 Class of ASM Fellows

Mr. Luis R. Leon, FASM
Associate Technical Fellow
Metallurgical, Propulsion Applications
The Boeing Company
Seattle, Washington

"A materials technology expert and mentor who pioneered utilization of advanced materials and processes to improve the performance of high temperature commercial aircraft propulsion support systems."

Dr. Virginia Osterman, FASM
Corporate Chemist
Solar Atmosphere, Inc.
Souderton, Pennsylvania

"For significant technical and educational contributions specific to vacuum heat treating processes, including use of vacuum furnaces for the embrittlement of titanium, tantalum and other refractory metals for powder production."
